SUMMARY

Backend Developer (Node.js | PostgreSQL) with hands-on experience building and deploying scalable REST APIs and full-stack applications. Skilled in API development, database design, and production deployment.

EXPERIENCE

Software Developer Intern

Humming Byte Technologies Pvt. Ltd **July 2025 - December 2025, Nashik, Maharashtra**

- Developed and deployed RESTful backend APIs for a QR-based digital menu and ordering platform using Node.js (Express.js) and PostgreSQL, reducing manual order processing time and improving restaurant workflow efficiency.
- Designed normalized relational database schemas, wrote optimized SQL queries with indexing, and managed data models for menu catalog and order management modules, ensuring fast and reliable data retrieval.
- Built and tested RESTful APIs for order lifecycle management and admin dashboard following MVC architecture; documented all endpoints using Postman for team collaboration and maintainability.
- Integrated Razorpay payment gateway APIs with secure transaction processing, webhook handling, and end-to-end checkout workflows covering success, failure, and refund scenarios.

PROJECT

UrbanPune.in — No-Broker Real Estate & City Discovery Platform | urbanpune.in

urbanpune.in • www.urbanpune.in/

- Built a full-stack city discovery platform from scratch, managing end-to-end SDLC independently.
- Developed a backend using Node.js (Express.js) and PostgreSQL for handling property listings, blogs, and news content.
- Implemented OTP-based authentication and designed normalized relational database schemas for users and listings.
- Built RESTful APIs supporting CRUD operations, search, filtering, and pagination for scalable data handling.
- Enabled location-based property discovery similar to real estate platforms, along with dynamic blog and news updates.
- Deployed and maintained the application in a production environment, handling debugging and performance issues.
- Attracting 300+ daily visitors, demonstrating real-world usage and platform scalability.

ServHunt - QR-Based Digital Menu & Ordering System

- Developed backend using Node.js and PostgreSQL for a QR-based digital menu and ordering platform.
- Built RESTful APIs, managed database schemas, and implemented server-side logic for real-time order processing.

EDUCATION

MCA (Master of Computer Application)

MES Institute of Management & Career Courses (IMCC) • Pune, Maharashtra • 2025-2027

BCA (Computer Science)

Modern College • Pune, Maharashtra • 2022-2025 • 9.30/10

HSC (Class XII)

Maharashtra Board • Dongav, Maharashtra • 2020-2021 • 89.67%

SSC (Class X)

Maharashtra Board • Mehkar, Maharashtra • 2019-2020 • 72.00%

AWARDS & HONORS

Top 3 Ranking Modern Colleges

- Ranked Top 3 in Computer Science Department at Modern College (Annual Academic Performance).

SKILLS

Frontend: HTML, CSS, JavaScript, React (Basic), EJS

Backend: Node.js (Express.js), REST APIs, MVC Architecture, Async Programming, Middleware, API Security, JWT Authentication

Database: PostgreSQL (Joins, Indexing, Query Optimization, Functions, Triggers, Cursors), MongoDB (CRUD Operations)

Programming Languages: C, Java, Python (Basic)

Core Concepts: Data Structures (Array, Linked List, Stack, Queue), OOP, Database Design

Tools: VS Code, Git, GitHub, Postman, Linux

Deployment: Application Hosting (Railway, Render), Production Deployment
